

Station name

# Comaneci

Space  
orientation

Stability and  
equilibrium

## Training Method

A unique exercise and training method to maintain balance and stability; By a system of cameras and a unique technology that includes the practice of the whole body

## How it works?

Different colors are displayed on the floor, in different combinations from the lightest to the hardest. By using a unique algorithm, the trainee is expected to maintain equilibrium and balance between the colors. Understanding, acceptance of the sheet and equilibrium of course is required.

## Measurement

We measure the balance, reaction speed and decision-making.

The concept of attention and concentration refers to a person's ability to stay focused on a certain activity for the time required of it. ADHD refers to the ability to stay focused relative to the age group.

### Tip of champions

Stay focused, stay balanced.  
Use pivot for balancing your body.

LUNAMIND is a startup company, specializing in technologies to improve thinking processes, and focuses on brain technologies. Our main activity and research is in developing an algorithm to improve thinking processes, memory and focus. We bring a revolutionary approach to the process of cognitive decline, which mainly characterizes the third age group.
